★ ★ ★ ★ ★ **Logan**

I passed with 920/1000! More than 45 questions were from your PDFs. Highly recommended!

★ ★ ★ ★ ★ **Hailey**

Updated material and correct answers. Passed AZ-900 on first attempt. Thank you ITExamsQuiz!

★ ★ ★ ★ ★ **Brandon**

Amazing accuracy. Out of 52 questions, 50 were from your dumps. Passed with 870 marks!

★ ★ ★ ★ ★ **Madison**

Customer support is very responsive. The PDFs are super accurate. Will recommend to friends!

Question: 1

ITExamsQuiz

You need to recommend a reporting solution for the organization.

Which two options should you recommend? Each correct answer presents a complete solution.

NOTE: Each correct selection is worth one point.

- A. AI Builder
- B. SQL Server Reporting Services (SSRS)
- C. Dynamics 365
- D. Power BI

✓ **Answer: B,C**

Explanation:

Scenario:

The reporting and analytics team must be able to create reports that include data from all facilities and all workers.

Management reports must present an overview of the entire organization. Other reports may be

limited to specific offices.

B: Power Apps apps can include reports that provide useful business information to the user. These reports are based on SQL Server Reporting Services and provide the same set of features that are available for typical SQL Server Reporting Services reports.

C: Microsoft Dynamics 365 online and Model-Driven PowerApps offers several advanced reporting options. Advanced reports are often necessary when business requirements demand complex calculations, returning multiple data sets, grouping large sets of data based on rules, and retrieving data from different data sources.

Incorrect Answers:

D: Scenario: Users cannot view Power BI reports within the Power Platform apps.

Note: Power BI enables data insights and better decision-making, while Power Apps enables everyone to build and use apps that connect to business data. Using the Power Apps visual, you can pass context-aware data to a canvas app, which updates in real time as you make changes to your report.

Question: 2

ITExamsQuiz

You need to recommend a solution for handling data entry requirements for the mobile audit teams. What are two possible ways to achieve the goal? Each correct answer presents a complete solution.

NOTE: Each correct selection is worth one point.

- A. Canvas app within Power Apps Player
- B. Canvas app within a browser
- C. Dynamics 365 Field Service
- D. Dynamics 365 App for Outlook

✓ **Answer: A,B**

Explanation:

Scenario:

Audit teams must have the ability to view worker information on their mobile devices.

Audit teams must be able to record data during visits to locations where workers are placed.

When you create an app, or someone shares an app with you, you can run that app on the Power Apps mobile app or in a web browser.

Question: 3

ITExamsQuiz

DRAG DROP

You need to recommend solutions to meet the organization's communication needs.

What should you recommend? To answer, drag the appropriate technologies to the correct groups of users. Each technology may be used once, more than once, or not at all. You may need to drag the split bar between panes or scroll to view content.

NOTE: Each correct selection is worth one point

Technologies	Group of users	Technology
Microsoft Teams	First Up employees	
Power Apps portals	Workers	
Microsoft 365 Business Voice		

Answer:

Group of users	Technology
First Up employees	Microsoft Teams
Workers	Microsoft 365 Business Voice

Explanation:

Box 1: Microsoft Teams

First up employees must be able to contact each other by using a secure system to ask and answer questions about medical cases.

Microsoft Teams key capabilities:

Connected

Secure

Managed

Collaborative and productive

Box 2: Microsoft 365 Business Voice

Workers must be able to communicate in near real-time with worker support agents.

Microsoft 365 Business Voice makes it easy for small and medium organizations to turn Microsoft Teams into a powerful and flexible telephone system. It's a replacement for traditional telephony providers and in-house phone systems that can be difficult and costly to manage.

HOTSPOT

You need to ensure that the solution meets the data security and compliance requirements. What should you recommend? To answer, select the appropriate options in the answer area. NOTE: Each correct selection is worth one point.

Scenario	Relationship behavior				
A worker transfers to a new client company.	<div data-bbox="732 491 1261 552">▼</div> <table border="1"><tr><td data-bbox="732 552 1261 604">Assign: Cascade All</td></tr><tr><td data-bbox="732 604 1261 657">Assign: Cascade None</td></tr><tr><td data-bbox="732 657 1261 709">Merge: Cascade All</td></tr><tr><td data-bbox="732 709 1261 753">Rollup View: Cascade All</td></tr></table>	Assign: Cascade All	Assign: Cascade None	Merge: Cascade All	Rollup View: Cascade All

Delete: Cascade All					
Delete: Remove Link					
Delete: Restrict					

Explanation:

Question: 5

ITExamsQuiz

You are designing a Power Platform solution for an organization that needs to integrate multiple systems, including Dynamics 365, third-party APIs, and legacy databases. The solution must ensure data consistency, scalability, and low maintenance.

Which approach should you recommend?

- A. Build separate custom connectors for each system and integrate them directly
- B. Use scheduled manual data export and import processes
- C. Use Microsoft Dataverse as the central data layer
- D. Use Microsoft Excel as the primary data storage

✓ **Answer: C**

Explanation:

Microsoft Dataverse is designed as a scalable and secure data platform for Power Platform solutions. It provides:

Centralized data storage across multiple applications

Built-in security and role-based access control

Support for business rules and logic

Seamless integration with Power Apps, Power Automate, and Dynamics 365

Option A increases complexity and maintenance overhead because each connector must be managed individually

Option B is not reliable for real-time or scalable enterprise solutions

Option D lacks enterprise-grade scalability, governance, and security
